Viewing Angle

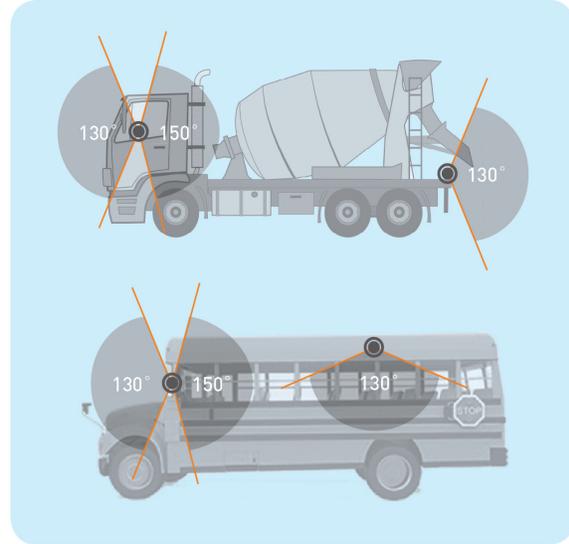

MDR-5000 (2 Channel Recording)

A commercial grade solution for risk management, loss prevention and driver safety coaching applications. Used in trucking, ready mix, taxi, bus and public safety fleets as a tool for capturing any liabilities inside and around the vehicle.

MDR-5010 (3 Channel Recording)

A commercial grade multi-channel solution utilized by towing, passenger transportation, and other specialty vehicle fleets that need an additional camera for capturing unique types of liabilities. An additional camera can be positioned to capture rear, side, or interior operations of a vehicle.

Specification

Resolution	Front - HD(1280X720), Inward- VGA(640X480), 3rd Cam-VGA(640X480)
FPS	MAX 15 FPS / Channel
Recording Angle	Front: 130° / Inward: 150°
Data Storage	SD Card, 64GB max(x2)
Data Protection	SD card Locking Mechanism(H/W) Proprietary File Format(S/W)
Data Back-up	Redundant Recording to Terminal Box
GPS	Built-in; Google Maps Compatible
Accelerometer	3 Axis G-Sensor(X,Y,Z)
Audio Recording	Built-in Microphone/PCM storage On/Off Selection

Software	(Windows) Video Review Player, Built-in Driving Report Card
